We love our Vintage Audio and other builttolast electronics equipment in an age of disposable products for a throwaway society. We might sell the kids before our classic silver Pioneer or Vintage Marantz, Kenwood and Sansui gear.<http://firewaterdamagedfw.com/test/fckeditor/uploadfiles/conceptronic-cm3s-manual.xml>

If you also value High Quality Manuals that enhance the ownership satisfaction of your vintage audio treasures, you found the right place. continued below. It IS Our Guiding Principle Add Site to your Favorites Other sites we host Phase Linear History Vintage Technics Database We sponsor two free Yahoo Audio Groups We are meticulous and give genuine best efforts to produce clean, wellconstructed manuals for you. A sidebyside comparison of our reproduction manuals with those from many other vendors will usually reveal an overall better appearance, construction, and print quality. Sometimes strikingly so. Our Customer Comments page is a fraction of what we receive from real customers and electronics technicians. The vast majority of our printed reproduction manuals are Very Good to Excellent on our Guaranteed Quality Ratings scale. But every single item is not and we refuse to give a false impression that they are. We want you to see a detailed description and individuallyassigned quality rating before you purchase. This timeconsuming extra service is almost never provided by our competitors. Customer complaints are nearly zero, perhaps one per 5001000 sales. We believe that virtually none of our competitors could truthfully make a similar claim. We are a USA based family business operating oldschool style. That means real people trying to serve you as if we were a walkin store in your local neighborhood. We always combine shipping on multipleitem orders and do not rip you off on shipping charges. If interested, check out About Our Manuals and other site sections with the menu links at the top of all pages. If you would like for us to be here in the future, you can help by telling your friends and by sharing links to our site in your discussion groups, forums, blogs and web sites. We have been slowly updating these manuals lists over the years.

As time allows we will replace the spare Factory ORIGINAL Manuals Catalog section with the same page format as these here in the reproduction manuals section. We also have more than 400 Gigabytes of various manuals, schematics, brochures, etc in mostly PDF format. They number perhaps 400,000 files. Truth is that we may never get them listed on our site. But they are available. Click here for further PDF manuals informatiion. If an item has a description and Price Code, then CLICK THAT PRICE PRECISELY identify the item you want with company brand. These WMS units have the frontloading CD player. Generally, they are able to be switched on, and the display responds to the commands of the Remote Control. The applicable PCB numbers all very similar with minor differences only are as follows There is no quick or cheap way to solve this. ALL of them must be removed. The DC electrical current in the machine is completely unstable, and all the semiconductors are highly stressed. One or more semiconductors have already failed. No wishful thinking will make the problem go away.

The correct horizontal twisting action will break the capacitor leads at their weak point, and the capacitor will separate from the PCB. Therefore the use of far higher quality capacitors is essential. In many cases but not this one, replacing the capacitors will solve ALL the problems, and no further troubleshooting is necessary. Current technology SMD capacitors are far less reliable and far more failure prone than conventional TTH ThroughTheHole capacitors. These solder pads suit capacitors with a 35mm lead pitch. For capacitors which must be mounted horizontally due to limited vertical clearance, creativity is needed. Pay attention to mounting positions shown in the previous large photos. For capacitors which will be mounted vertically, bend and cut the new leads as shown in this photo. You may very well have a working machine again, and with even more fulfilling sound than the original situation, having used far higher quality components. There are 15 pins arranged in 2 rows, and the pins of interest to us at this stage are Pin 4 Left input, Pin 1 Left Output, Pin 12 Right input, Pin 15 Right output. This was the problem in this case. A completely defective waveform showed an amplitude of less than 1mV PP on all these components. That told me that these IC's were not performing correctly. The VCC showed less than 1mV DC. That told me clearly that the DC Voltage rail is defective. All checked just fine, with no shorts, or abnormal readings across the pins. I connected my spotlight and magnifying glass and found a bit of black soot at the position shown with the red arrow. I scraped away the black soot, and discovered the break in the copper tracing. Excellent sound. He service customers from all over the world, especially reviving equipment at the "Component Level" that other technicians do not know how to repair, or declare "Parts no longer available". Its unfortunate that a worldrenowned company would cheapen an excellent product by using inferior components.

I hope myself and other technicians can save a lot of these units, and restore them to better than original condition. Thanks again, and God Bless! It sounds great. Sometimes it sounds like the people are behind me talking. And sometimes when a dog on the TV is barking it sounds like the dog is outside barking. One of these days Ill open it up and look everything over good. The time involved and the risk not being able to successfully finish this repair makes this a very dangerous repair to begin with. This requires a courageous expert like yourself! I cant afford to buy the tweezers for my iron right now, so I would just use both of my irons to remove them real quick. Very educative article. Very time consuming work as well as article. Many thanks for sharing! I usually remove them using a very fine solder tip on my iron by melting the solder on one end of the component and making sure it is well heated, then quickly moving the tip to the other end and carefully sliding the component off its pads. If youre quick enough the solder from the first end is still melted and the component will come off easily. Thanks for sharing. Ive learned something more. I heard this has gotta do with the capacitor as well. Can experts help please What I need is one of you technicians. How do I find you I miss my Bose so much. Not sure if I am capable of the repair but Im inspired to try having read your excellent description. Many many thanks. My unit has begun to play one note of a song only, then begin clicking repetitively. I can forward to successive music cuts, but the same thing happens. I having the same problem as Robert Smith which is dated Oct. 14,2019. Unit plays a

couple notes of the cd selection then starts clicking repetitively. The way I've found to listen to the unit is to insert a cd cleaner discmax cell cd340 before inserting the music cd.

I let the cd cleaner run about 10 minutes or until I no longer hear the repetitive clicking then remove it and insert the music cd. The music cd then plays fine and all cd's after this procedure until I turn off unit for a few hours. After a few hours I have to do the same procedure again before cd's will play. This procedure has worked at least 10 times and,so far, is the only way I can listen to cd's. Care to venture a possible cause or fix for this odd problem. Brantley Poss Learn how your comment data is processed. Model York. Be the first to review it. Write a review Ask a question 2 questions from our usersIn the last year the base has completely gone whilst the treble still works perfectly. Is this a terminal issue or can it be fixed, if so who would be qualified to do so and what parts would need replacing. Like Share More 3 answers Linds 3 years ago Hello Alec, I live in A.C.T. and technicians here are quite scarce. The local BOSE store should be able to point you in right direction. Although you must bear in mind today's attitude is replace not repair,so don't expect a lot of positive actions. Like Report Alec 3 years ago Many thanks. Like Report Mischa 3 years ago I am not completely clear on this, but the service manual suggests that the two audio channels of the TDA7376 are used on a different EQ setup, respectively. If this is the case, maybe one of the speakers stopped working. On my AWRCC4 unit, the two speakers sound the same both left and right. There might also be a problem with the amplifier chip, or the equalizer chip connected to it or even the power supply part that feeds the power amplifier. If you know what you are doing and on your own risk, you could open the cover and unplug one after another of the two speaker cables you will see. This way you can tell if it has anything to do with the two audio channels.

Like Report phantom asked 4 years ago Wave Music System I My Bose wave system has been unplugged for a few weeks moving everything to paint the house. When I plugged it in yesterday it showed no signs of life. It is the first Wave I think. I bought it direct from Bose. Nothing will work. It hasn't had a lot of playing time so it is relatively new. Anybody else encountered this problem. Like Share More 1 answer Wanoel 4 years ago I regret i am unable to advise you i am not tech minded. I would add to my initial comments that you can only play a single disc and cannot select a single track using the numbers, you have to play the disc out until you hear the track you like. A lot of money for such a basic thing. Register now and take advantage of ProductReviews Brand Management Platform. Manage this listing ProductReview.com.au has affiliate partnerships. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Back when most of us had component systems, I always bought Bose speakers.

I have a pair of speakers for my PC desktop that are at least seven years old and have brought me endless hours of pleasure, and sound every bit as good as when I purchased them. Last year I bought a television, and found dialogue hard to discern from background noise in some programming. I purchased a Bose TV Bar speaker without hesitation, and it too, is worth every cent of the four hundred dollars I paid for it. Back to the Wave even with the antenna attached it picked up less stations than the under-the-cupboard radio in my kitchen, which doesn't use any antennas. Because of the varied sound quality from most of the stations, the radio sound was tinny and obnoxious. I paid half a grand for this. Then I created an MP3 CD opposed to an audio CD, because it holds over 100 songs. As I inserted CD, I half expected it not to play, since I've read of the many problems with CDs, but it played fine. However, the sound was a notch below OK far from the other Bose products in my house. Additionally, it did not delineate the track and artist name of the current track on the display. I use a radio station to wake me up in the morning with an inexpensive clock radio, but to be entertained by the station's offerings for any length of time, with fair reception, replete with ads of course, not the Wave's fault proved intolerable. He or she hit it the nail squarely on the head. I have been spoiled by the wonder of streaming music commercial-free and exactly what I want to hear. Lastly, I hooked up my iTunes player through the aux jack and again, I was completely nonplussed by the sheer flatness of the sound. I really would give this radio one star for it not coming anywhere near the ballpark of the Bose experience I am used to, but I am giving it two stars because I should have realized that it is indeed, a decade and then some old on the technology side and passed it by. I think it is human nature to believe if something is high in price, it must be high quality.

That, along with my past experience with Bose sound, is what tipped the scales into my decision to purchase it. Going forward, I will not have that mindset. Needs to have some controls on unit itself for when remote is lost The radio still works beautifully. However, the CD player started malfunctioning a couple of weeks ago. This is not the result of excessive use. I hardly listened to CDs in the summer busy elsewhere in the garden, and seldom for more than one hour per day about 1 full CD. After posting a 3-star review here not mean, but dissatisfied, I reported the problem to Bose. Their answer emailed to me this morning, Monday, January 4th was to reset the system, i.e. unplug it from the wall, wait five minutes and plug it in again. I did that, and it worked. Thank you so much Bose! By the way, I am still using the Bose noise-cancelling headphones that I bought back around 2003 take of leave one year. I bought new earpads last year or the year before, but the frame has aged; it broke twice already Krazyglue does not work, but ducttape does. Shortly after I wrote the above review, the CD player stopped working again. I tried several times unplugging it, and replugging it after five or ten minutes. Nothing worked. I do not intend to have it repaired too much of a hassle, especially as I did not keep the original packaging. Fortunately, I found that I can connect the system to a portable CD player, and that works. My advice though do not buy this

radioCD player; instead buy just the radio and a portable player, and connect them. I noticed that it had a Ship From address of Bose Returns and Replacements. I plugged it in and tried it and the CD player worked flawlessly for about a year then it began skipping on tracks or just flashing Reading Disc but never playing. Playing CDs was spotty and sometimes it would play them on first try with no trouble. These CDs would be in pristine condition with no scratches, etc.

Around the 2 year point, it still played some CDs with no trouble then a few days later it wouldnt play these same CDs. I purchased the separate 2year maintenance and was ready to send it back and it started playing the CDs okay so, unfortunately, and, I would guess, what the unaffiliatedwithBose seller of this extra coverage hopes for, I didnt send it in so now I am stuck with the Bose Wave Music System III. I just looked through the Bose box it arrived in and see theres a sealed up Bose Introduction CD for the Bose Wave Music System III. I removed the plastic shrinkwrap, opened it and loaded it in the CD player of my Bose Wave Music System III and, after clicking few seconds, the display reads NOT PLAYABLE. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. UML class diagram insert which data type is another property of the items in an application. It may be used to differentiate the types of the items and their customs. Here are some examples. Let us see the diagram which has the data type properties displayed. The highlevel object is emphasized. Here, its got three properties to determine its type. The high class course has a property which is a data type. This is a kind that is nonoptional. It is also referred to as an integral form and the value of the property is the type that has been chosen. Therefore, if you would like to choose the value of the property then you want to pick the data type which gets the kind of this highlevel item. The low cost object is in the kind of a property which is an integral type and this is discretionary. But if you select this kind then you want to indicate the type of the non profit object. Here, it is the data type of the lowlevel object. At length, the kind of this item has the data type. Here, it is the integral type and the value of the property is the value of the data type. Moreover, UML class diagrams provide insight into the design of an application. It is designed in such a way in which the architecture of the program remains intact, with the assistance of course diagram. To draw a UML class diagram, its required to execute the analysis of their projects and decide on the best and suitable formfor class diagram.

There are particular tools which assist you in this process.
